EfficientNet-B0 · measured backbone and evolved head
Input
RGB
224 × 224
Stem
[32, 112, 112]
Conv · BN · SiLU
MBConv 1–3
Channels
16 / 24 / 40
MBConv 4–7
Channels
80 / 112
192 / 320
Baseline: backbone frozen · DE selects last k stages and head width
Final conv.
[1280, 7, 7]
Feature map
Avg. pooling
1280 features
Evolved head
Dropout → Dense
SiLU → Dropout
Class logits
Prediction
10 tomato classes
Class probabilities
Head width 0 skips the hidden Dense and SiLU layers.
